

COLONEL LIGHT GARDENS PRIMARY BYOD Program

About the program:

At CLG the Bring Your Own Device (BYOD) Program is for years 5 to 6 students. We aim to foster a sense of responsibility and personalised access to technology to enhance student learning. By equipping them with their own device we are empowering them with a tool to communicate, inquire and collaborate.

Contact Penny Rowe for further information or questions

Device requirements:

- Apple iPad, Wi-Fi only, large screen
- Storage 64GBmin, 256GB preferred
- Latest operating system
- Recent models, iPad 9, 10 or Air

Accessories:

These accessories are recommended but not necessary

- Keyboard
- A protective case
- Apple Pencil

Where to purchase:

- Comp Now
<https://shop.compnow.com.au/school/colonel-light-GPS>
- JB-HI-FI BYOD Portal
<https://www.jbeducation.com.au/byod/> school code CLG2023
- Apple Store
- Other leading retail stores

Home use:

We highly recommend that parents set clear boundaries for their child's use of the iPad at home. These include setting time limits to use the device or times when it needs to be turned off. Screen Time is a function that is already on the device and gives parents control over what their child can access.

Screen time is a recommended feature of the iPad that enables parents to set up child Apple ID's and manage content restrictions.

Back up:

We strongly encourage parents to support their child to back up their iPad. This will ensure that they do not lose any work or data if their device is lost or damaged. Insurance is also recommended.

Apps for school

- Microsoft apps: Word, PowerPoint, Excel, OneNote and One Drive
- Apple apps: Clips, keynote, iMovie, Garage Band and iBooks
- Other: iMotion HD and Sphero Edu
- Please remember that the iPad will be used as a learning tool and to please keep other games and apps at a minimum

Starting the year:

The IT support team will help each student to connect to the WiFi and school systems, such as printing and sharing.

Students need to ensure they bring their iPad to school charged and up-to-date with the latest operating system.
